HOW WE WORKED AS A TEAM – ROLES AND RESPONSIBILITIES

01 FRONTEND DEVELOPMENT

- *Set up the frontend environment (HTML, CSS, Angular).*
- *Design and implement the UI for login/signup, admin, and customer dashboards.*
- *Integrate with backend APIs for data display and submission.*

02 BACKEND DEVELOPMENT

- *Set up the server and database (MySQL).*

03 CONNECTIVITY/INTEGRATION

- *Ensure frontend-backend integration.*
- *Develop RESTful APIs for user authentication, deposit management, and interest calculation.*

LESSONS LEARNT

01 Effective Team Collaboration:
Established clear communication channels and regular sync-ups for seamless teamwork and quick issue resolution

02 Efficient Technology Integration:
Successfully integrated Angular with Java Spring Boot, leveraging MySQL for scalable data management and smooth frontend-backend interaction

03 Effective Time Management:
Prioritized tasks effectively and set clear deadlines, which helped in meeting project milestones and managing workload efficiently.

04 Continuous Improvement:
Promoted continuous feedback and knowledge sharing to foster innovation and team improvement.
